

Have you noticed that within the word Jaguar coexists the word agua (water)?

To tell the world about ISA's commitment to the planet, we created Agua Jaguar! Our communication vehicle at COP16 to quench your thirst for a better world, while we continue to take care of what you see the least.

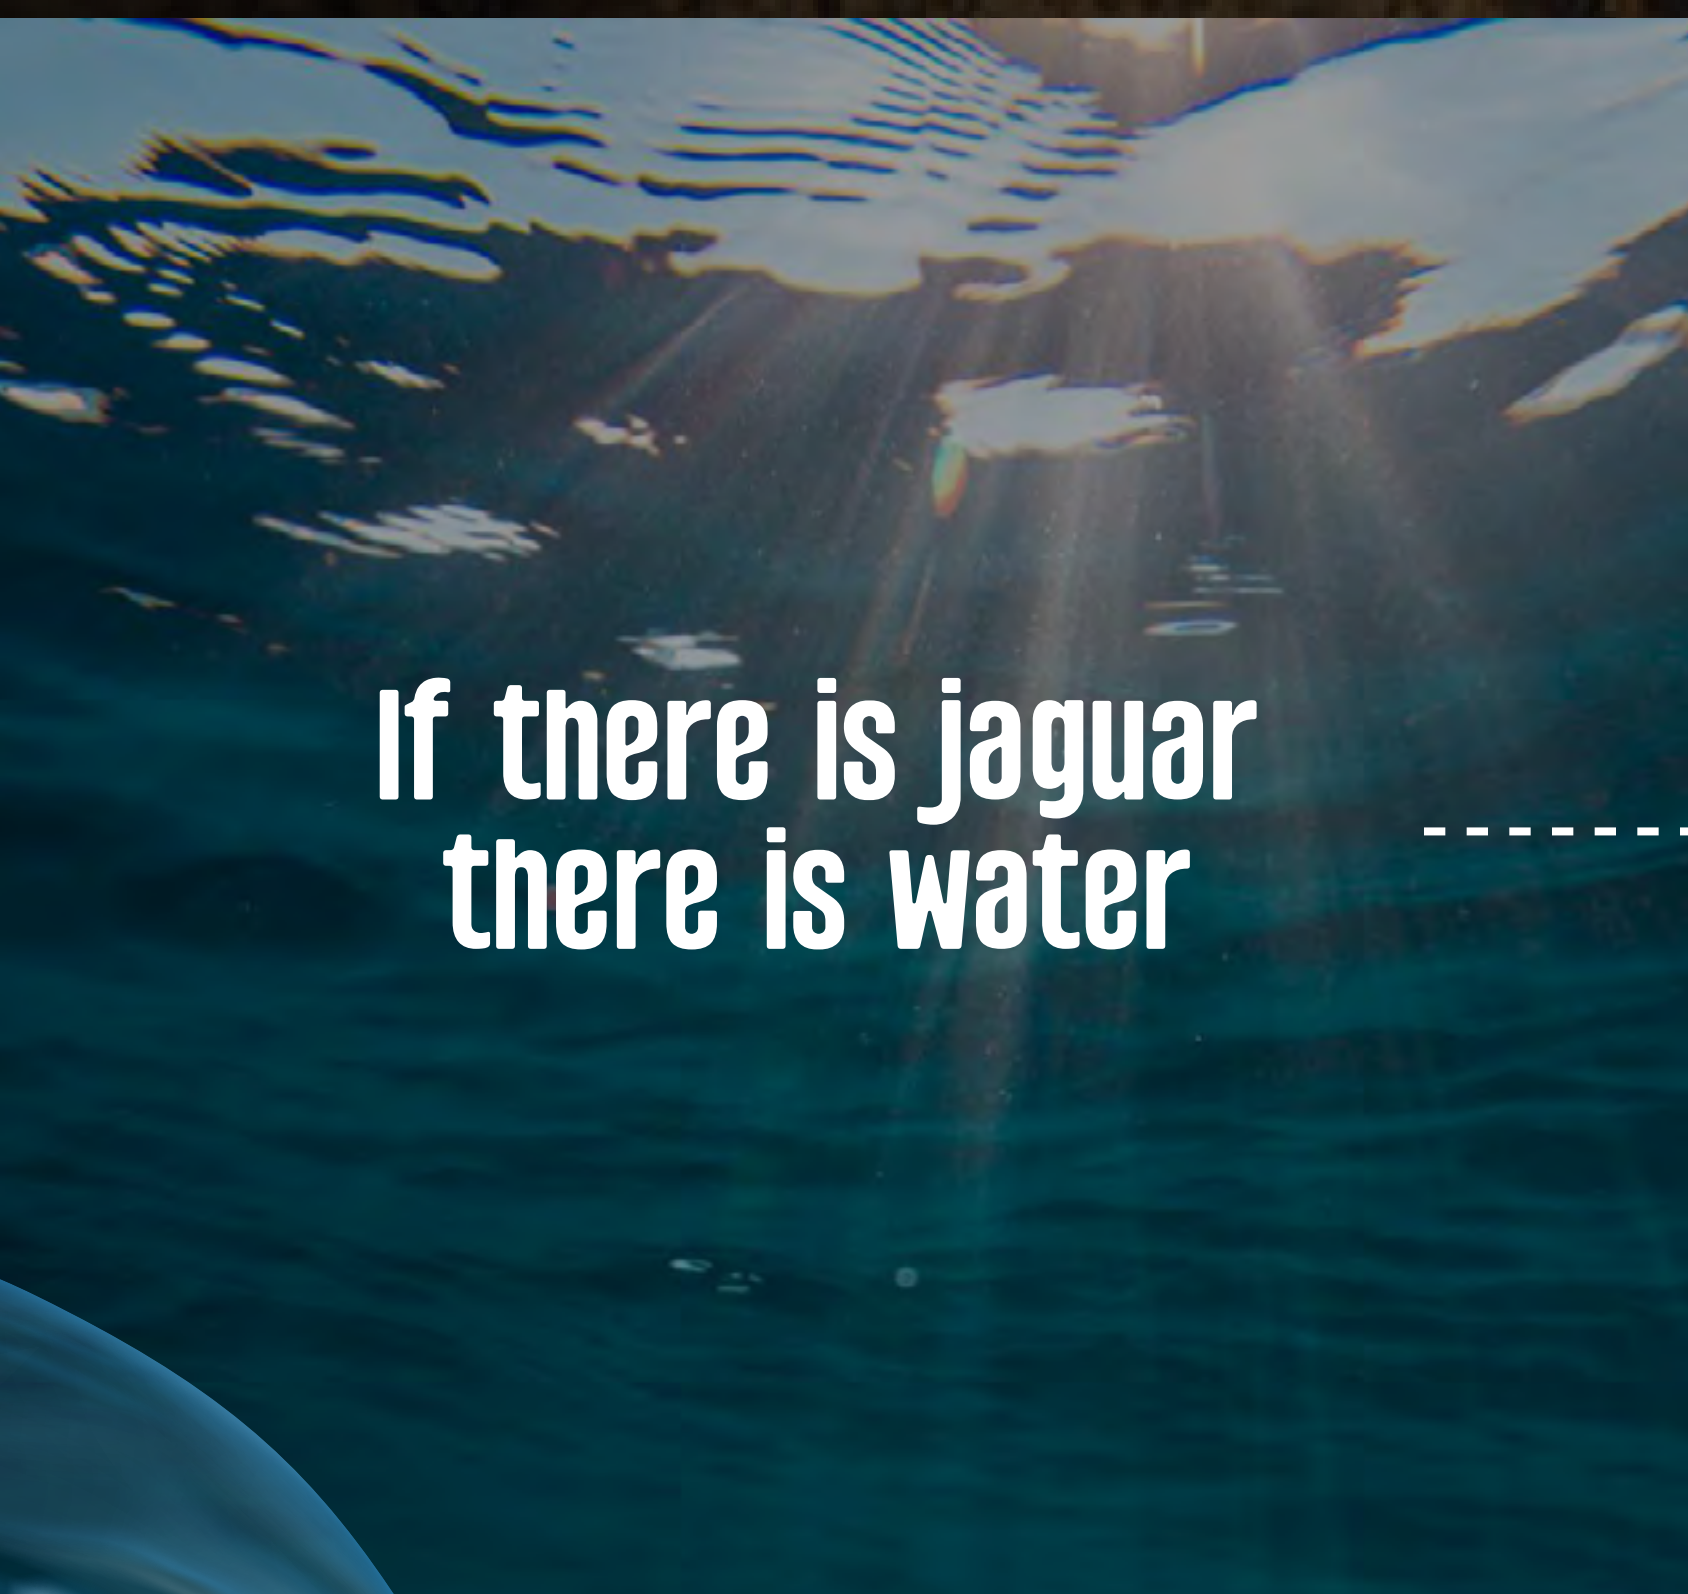

Why the jaguar?

The jaguar has a fundamental role for ecosystems:

It protects biodiversity, water and forests. It plays a key role in controlling the populations of other species and promoting healthy ecosystems.

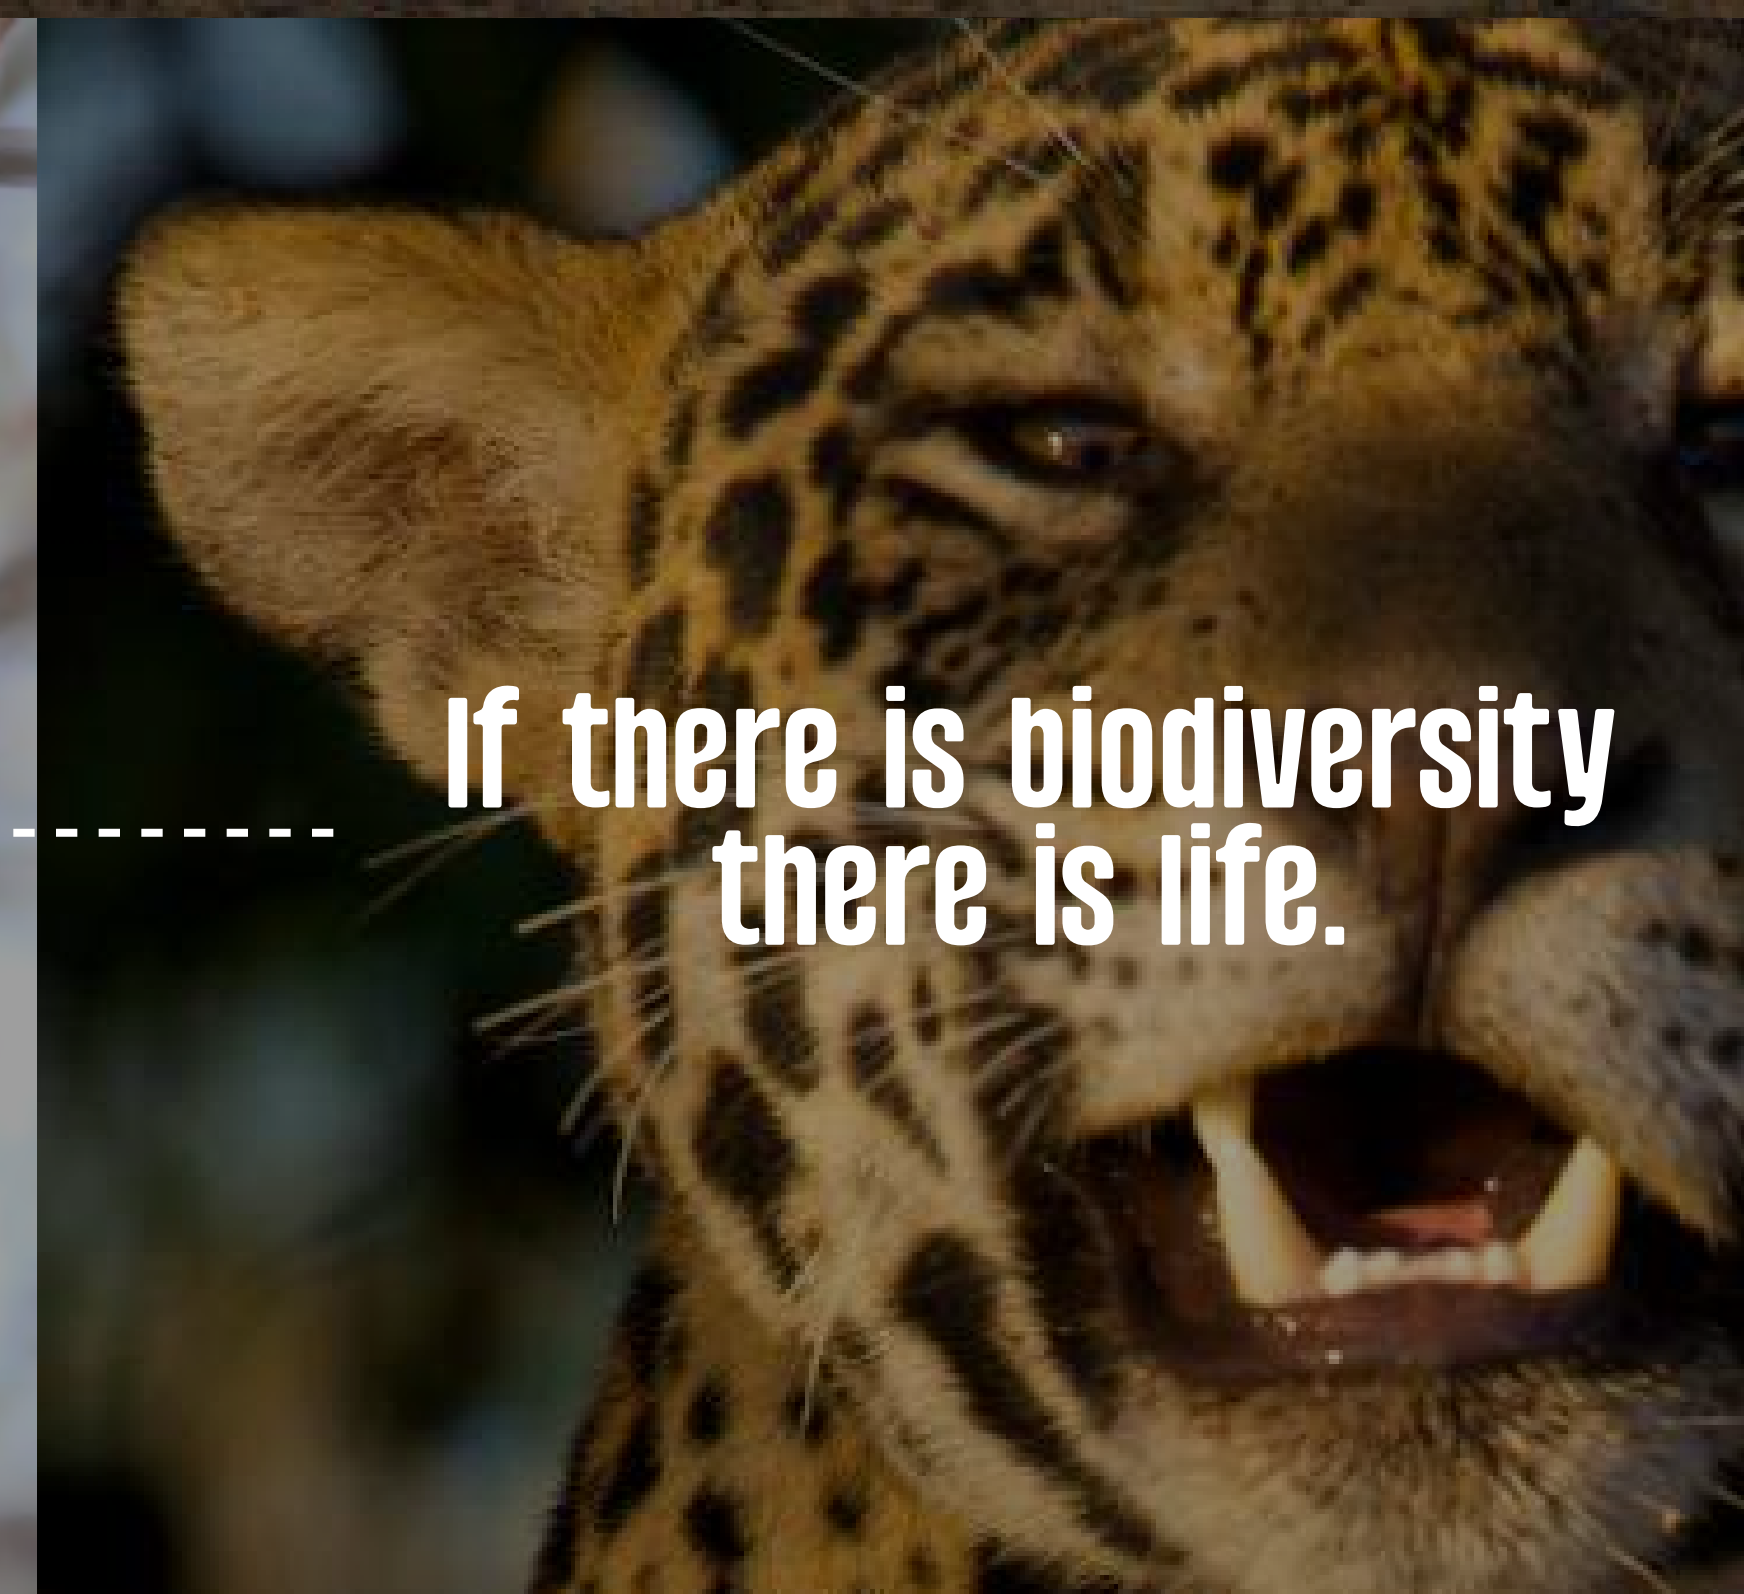

If there is jaguar there is water

If there is water there is biodiversity

If there is biodiversity there is life.

An initiative supported by:

Postobón

Strategic ally for the source of life = WATER.

Strategically for:
Reuse of materials
Composting of organic material

Your thirst for a better world starts with Jaguar water

Postobón

**Contribution to
biodiversity and
water protection**

Postobón Bio

Más verde, más vida.

POSTOBÓN BIO, TOWARDS A SUSTAINABLE WORLD

Water is fundamental; therefore, they propose to manage it in an integral way, making efficient use of it, taking care of it through joint efforts, while protecting and conserving the key spaces for its source and conservation.

THEY PRIORITIZE THE WATER SAFETY

of their work centers and operating environments.

They promote circular economy dynamics.

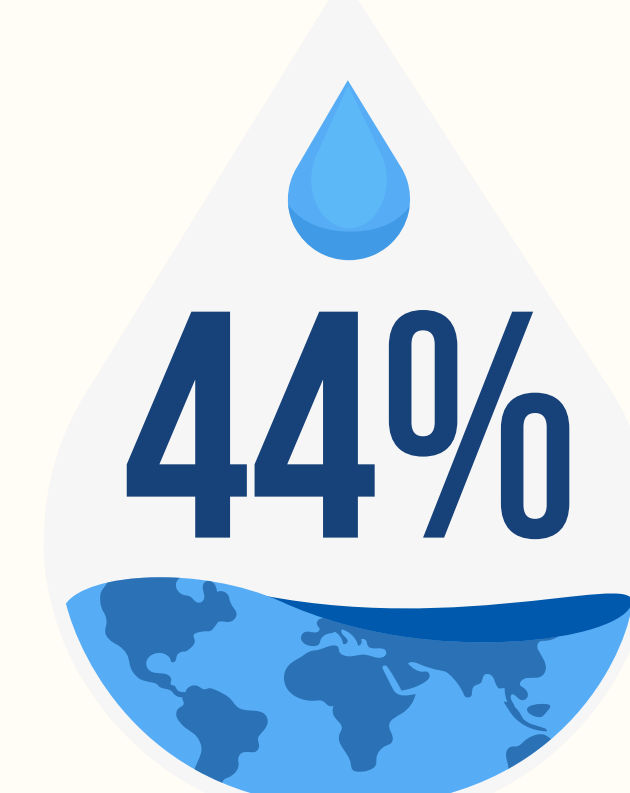

They manage climate change by advancing in the decarbonization of the business through the mitigation and reduction of Greenhouse Gas emissions.

29,484 HECTARES

of key forest for water and diversity, equivalent to 46,068 soccer fields.

In the last 10 years, they have reduced water consumption per liter of beverage produced by 44%.

In Sesquilé, Cundinamarca, it protects an area of

1.115 HECTARES

where they preserve moorlands, high mountain wetlands, high Andean forests, aquifer recharge areas, animals such as the spectacled bear and bird species.

They allocated agricultural insurance to 709 producers to protect their crops from the effects of the weather. 32% of the insurance was allocated to women farmers.

63 WATER SOLUTIONS DELIVERED

since 2020 for the benefit of 47,155 people.

They were the first beverage company in Colombia certified as Carbon Neutral.

**Inspired
by nature**

Inspired by nature, at Esenttia, transformation is constant.

Circularity is in its DNA. The regenerative power of the planet motivates them to recycle and create an infinite cycle, through projects and initiatives of great impact for the care of the environment.

"To transform and being transformed by sustainability". That is their higher purpose, and this is how they make the circular economy a reality in Colombia:

15 THOUSAND TONS

of plastic waste are transformed into high quality resins thanks to their mechanical recycling plant.

10 THOUSAND RECYCLERS

from all over the country are part of the inclusive Supply Network.

THEY PRODUCED THE FIRST CIRCULAR POLYMER

in Latin America, through advanced chemical recycling.

They have bio-based, plant-based, and bio-compostable polymers.

THE CUPS IN WHICH THE JAGUAR WATER IS DRUNK ARE MADE OF THIS ORGANIC MATERIAL.

In addition, Esenttia is an ally in providing these cups during COP16.

THEY HAVE DELIVERED MORE THAN 250 PIECES OF FURNITURE

that incorporate recycled plastic in their construction, including houses, parks, docks, letters, bridges, among many others.

THEY RECIRCULATE

80%

of wastewater during the production process.

The first company in the Caribbean Region certified as Carbon Neutral.

They contribute to the conservation of the Ciénaga de la Virgen, in Cartagena,

WITH MORE THAN 7,000 MANGROVE SEEDLINGS.

FOLLOW THEM ON THEIR SOCIAL NETWORKS FOR MORE INFORMATION.
