CONEXIONES QUE INSPIRAN

Management of trade associations

ISA and its companies have a stakeholder relations strategy, in which the trade associations play a relevant role as the company's connection with the business, sector and country dialogues. In turn, the objective of participation in these spaces is to contribute to the construction of public policy, participate and lead conversations for the transformation of the sectors for the benefit of society and create collaborative networks that allow alignment with the priorities of the countries.

Today, ISA and its companies actively participate in more than 100 relationship spaces in the countries where it operates, with defined work teams, spokespersons, and consolidated agendas. These spaces do not have among their objectives to finance or promote political parties, their representatives, or candidates, or do they sponsor congresses or activities aimed at political propaganda.

Name of organization, candidate or topic	Type of Organization	Total amount paid in FY 2023
<p>World Economic Forum</p> <p>International non-profit organization that promotes public debates on global issues. Its objective is sustainable development, the constant improvement of public and private organizations and the progress of society.</p> <p>It promotes the concept of Conscious Capitalism and the Fourth Industrial Revolution that today are pillars of corporate application around the world. And its discussions have addressed fundamental issues of global concern, such as international conflicts, poverty, environmental problems, and their possible solutions. In the last 10 years, emphasis has been placed on issues such as new geopolitical dynamics, the Fourth Industrial Revolution, globalization, climate change, sustainability and rebuilding political trust at the international level.</p>	<p>NGO</p> <p>ISA and its companies strengthened their participation in the World Economic Forum (WEF) on four topics:</p> <ol style="list-style-type: none"> 1. Energy Transition: In addition to actively participating in the presidential-level "Electricity Governors" working group, a public policy document was developed for mobilizing clean energy investments in Colombia, leading the energy transmission chapter and strengthening multi-stakeholder coordination through industry and trade dissemination of the document's recommendations. 2. Cybersecurity: ISA actively participated in the working committee that links cybersecurity and electricity to propose risk mitigation strategies and share lessons learned for energy security in a changing environment. 3. Corporate Governance and Compliance: ISA formally joined the global Partnership Against Corruption Initiative (PACI) and promoted the strengthening of standards and practices that improve corporate behavior. 4. Sustainability: Leveraging the COP16 Biodiversity Summit, ISA promoted a Latin American agenda that highlights the competitive advantage of a proactive contribution to the environment and biodiversity; and led Colombia's contribution to the development of the biodiversity roadmap for the region. 	<p>COP \$912,003,142</p>
<p>Institute of Electrical and Electronics Engineers – IEEE</p> <p>This contribution includes the value paid by ISA</p> <p>IEEE is the world's largest technical professional organization dedicated to advancing technology for the benefit of humanity.</p> <p>Through this think tank, technology developments and references applied to the energy and electricity sector worldwide are shared</p>	<p>Trade association</p> <p>IEEE, an association dedicated to advancing innovation and technological excellence for the benefit of humanity, is the world's largest technical professional society. It is designed to serve professionals involved in all aspects of the electrical, electronic, and computing fields and related areas of science and technology that underlie modern civilization.</p> <p>IEEE members can access information on local events and activities an integrated multi-functional platform and global network of technology-focused professionals, leveraging IEEE's extensive knowledge base and community of thought-leaders. IEEE provides:</p> <ul style="list-style-type: none"> • Network with other technology professionals • Establish a professional profile highlighting your accomplishments • Join and participate in discussions on various technical interests • Create a group to share and collaborate on projects. • Contribute to the improvement of public understanding of engineering and technology and seek standards for their practical application 	<p>COP \$242,977,500</p>
<p>Asociación Gremial de Transmisoras de Chile (Transmisoras AG)</p> <p>Association that brings together the companies that make it possible to connect the country, transporting energy power to all parts of Chile. Committed to the development of the infrastructure that will allow us to have a greener and more sustainable energy future.</p>	<p>Trade association</p> <p>The Association of Transmitters of Chile promoted by ISA InterChile has the purpose of strengthen the conversation about the importance of power transmission in the decarbonization process of the energy matrix. In 2024, Isa Energía Chile's activities within the sector focused on influencing the regulatory agenda on issues related to sector development: transmission planning, permitting, innovation, health and safety, and sustainability.</p>	<p>COP \$404,935,618</p>

An aerial photograph of a lush green valley with a winding river. A series of high-voltage power line towers stretch across the valley towards a bright sunset on the horizon. The sky is filled with colorful clouds in shades of orange, pink, and blue. In the foreground, there are large, semi-transparent white graphic elements: a sphere on the left and a curved shape on the right.
