### **ISA announces the creation of the Occupational Health and Safety Directorate and the appointment of Cristian Augusto Remolina as its Director**

Interconexión Eléctrica S.A. E.S.P. (ISA) announces that, beginning January 22, 2026, a new Occupational Health and Safety Directorate will be established under the Organizational Talent Vice Presidency. This decision aims to strengthen our unwavering commitment to protecting and prioritizing the health, safety, and well-being of our employees and all individuals within our value chain. It also seeks to elevate our standards and promote a culture that prioritizes the protection of life at all times, positively influencing process performance and reinforcing proactive risk management.

In this regard, Cristian Augusto Remolina Álvarez, who has served as General Manager of Red de Energía del Perú S.A. (ISA Energía in Peru) for the past five years, will assume the role of Director of this new area following the conclusion of his expatriation period.

Cristian has more than 20 years of experience within ISA and its companies, in areas such as project management, operations, asset management, reliability, regulation, and leadership of energy transmission businesses in Colombia and Peru. He has led teams in multinational B2G and B2B environments and has contributed to the consolidation of high-performance operational models.

As General Manager of ISA Energía in Peru, he oversaw the comprehensive management of the transmission investment portfolio and the lifecycle sustainability of assets in that country. He also served as Operations Manager and Project Manager in ISA Energía in both Peru and Colombia, leading infrastructure, operations, maintenance, and network renewal projects. In Colombia, he also held the role of Asset Management Manager, where he strengthened the implementation of the methodology and prepared the organization for ISO 55001 certification.

Cristian is an electrical engineer from the Universidad Industrial de Santander, holds a master's degree in Electrical Power from the same institution, and has an MBA from the Externado University of Colombia.

Following this announcement, Brenda Rodríguez Tovar will serve as Acting General Manager of ISA Energía in Peru. Brenda has more than 27 years of experience within ISA and its companies. Since April 2023, she has been serving as General Manager of TRANSELCA, and for 24 years she held the role of Financial Manager for the company.

Meanwhile, Roberto Antonio García Riascos, Transition Manager at TRANSELCA and a 27-year veteran of the organization, will assume the role of Acting General Manager of the company.

We wish Cristian the very best energy in this new professional challenge. We are confident that his knowledge of the business and ISA's companies will enable the organization to elevate its standards in occupational health and safety. Likewise, we thank Brenda and Roberto for their commitment and support them fully as they take on these new responsibilities.
